
Public Notice:

The Vermont Department of Environmental Conservation (DEC) will be holding several informal public meetings to solicit your input in the development of a 5-year Basin Plan for the Walloomsac River, Hoosic River and Batten Kill. The meetings are open to the public and designed to gather community involvement, and identify water quality, concerns, interest and goals. These public forums are the initial steps in the planning process.

Please join us in developing a basin plan for the Batten Kill, Hoosic and Walloomsac Rivers. For additional information contact Josh Gorman, DEC Watershed Coordinator 802-447-6501.
